IMPORTANT SAFETY RECALL INFORMATII

Domnule/doamna client

Re: Posibila defectiune a corectiei cantitatii de injectie a combustibilului FI-ECU

Ca urmare a activitatii noastre permanente de monitorizare a calitatii, am descoperit existenta unui posibil defect in cazul unor motociclete CMX1100 MT/DCT comercializate de Honda Trading Romania, modele 2021-2024. In cazul unora dintre aceste motociclete, in timp ce se coboara de la o altitudine mai mare in trafic cu o viteza mica de aproximativ 40 km/h fara a deschide acceleratia, matorul luminos de defectiune (MIL) se poate aprinde la atingerea unei altitudini mai scazute, iar motorul se poate opri in timpul accelerarii. Repornirea este posibila, dar durata de mers in gol este mica, provocand opriri ulterioare. Prin oprirea si repornirea din comutatorul principal se restabileste functionarea normala.

Ne cerem scuze pentru acest inconvenient, insa, dorim sa asiguram in permanenta un inalt nivel de performanta si securitate al motocicletei Honda pe care o detineti.

IMPORTANT

O verificare completa poate fi facuta in baza indicatiilor producatorului doar de un dealer Honda autorizat.
